

Georgia Interoperability Network Operator Training

The Georgia Emergency Management Agency/Homeland Security and the Georgia State Patrol have collaborated to provide a web-based course on how to operate the Georgia Interoperability Network (GIN). The course describes the fundamentals of operating the GIN through explanations, demonstrations and skill practice activities.

This course is available free of charge at the following web address:

<http://gintraining.gatech.edu>

To register you will need to use your email address (Do not use an email address shared by others) as your LOGIN ID. You will need to set up a PASSWORD that you will not forget, complete the registration forms AND SELECT THE NAME OF THE AGENCY YOU WORK FOR from the drop-down box that asks for your **GROUP**. You must select your own group for your training records to count.

If you have questions about using the course, please contact Mark Hodges at 404-407-6987 or mark.hodges@gtri.gatech.edu.
